## 2007 Executive Summary

### Overview

In 2007, 284 institutions were included in the analysis of data from the Campus Facilities Survey (CFI) of the Society for College and University Planning (SCUP). This was the fifth and final year that general space use data was collected. While SCUP has attempted to use the CFI as a means of collecting information to provide a sense of the size and growth patterns of college and university facilities, it has been unable to generate sufficient participation rates to make the data useful over the long term.

Unfortunately, this continues to leave gaps in space information that have existed since 1974, the last time the federal government collected such data. While some states, such as Texas, make the space use data of its higher education institutions available to all, they are the exception, rather than the rule.

In 1974, there were 3,038 public and private colleges and universities in the United States. In the 2006 edition of its Almanac, *The Chronicle of Higher Education* reported that there were 4,276 US colleges and universities<sup>1</sup>. The net assignable square feet (NASF) on campuses today is unknown, but estimated at over 6.0 billion and growing. This represents a nearly five-fold increase from the 1.3 billion NASF reported after the last federal survey.

Enrollment has continued to increase at a rapid rate. The projected enrollment for 2007 in postsecondary education is nearly 18,000,000<sup>2</sup>, compared to 11,700,000 in 1979. Both figures are from the *Digest of Education Statistics: 2006 Table 3*, published by the National Center for Education Statistics (NCES). Enrollment is projected to continue to climb for the foreseeable future.

### Survey Description

The SCUP Campus Facilities Inventory is an annual survey comprised of a common space data set developed using standardized space classifications from the NCES *Facilities Inventory and Classification Manual (FICM)*<sup>3</sup>. *FICM* is generally accepted as the standard resource for facility description purposes, as most institutions of higher learning have adopted it as the basis for their basic space inventories. The CFI asked institutions to report on the quantities of space in each room use category, such as classrooms, instructional laboratories, and residential, on their campuses at the time they submit survey data.

1. <http://chronicle.com/weekly/almanac/2007/nation/nation.htm>
2. [http://nces.ed.gov/programs/digest/d06/tables/dt06\\_003.asp?referrer=report](http://nces.ed.gov/programs/digest/d06/tables/dt06_003.asp?referrer=report)
3. The FICM used for this survey was published in August of 2006.

The *FICM* Room Use categories covered in the 2006 SCUP CFI Report are:

- 100** Classrooms
- 200** Laboratories
- 300** Offices
- 400** Study
- 500** Special Use  
Including Athletic, Media Production, Clinics, Animal Quarters, and Greenhouses
- 600** General Use  
Including Assembly/Meeting, Exhibition, Food Service, Day Care, Lounges,  
Merchandising, Recreation
- 700** Support Facilities
- 800** Health Care
- 900** Residential
- 000** Inactive or Alteration Areas

Institutions that participate in the CFI receive an Excel file containing space data matched with institutional characteristics found in data submitted to the Integrated Postsecondary Education Data System (IPEDS). Only participating institutions may receive space data. For purposes of the CFI survey, space data was considered valid for two years. Hence, the aggregate information presented in this report represents data submitted in both 2006 and 2007. Nonparticipating institutions, corporations, and individuals may purchase a copy of this summary report, but do not have access to data on individual institutions.

## Highlights

There were 284 participating institutions in the 2007 SCUP Campus Facilities Inventory, with 276 of them providing sufficiently robust data that it could be used for analysis. Some of the results of the survey, based on this sample, are highlighted below.

- A total of 677,633,100 NASF (net assignable square feet) was surveyed in the 2007 CFI. This is a modest increase from the past two survey years of 2005, with 651,759,397 NASF surveyed, and 2006 with 661,885,732 NASF surveyed.
- The number of participants in the CFI varied by 16 institutions among these years with 289 participants in 2005 and 273 in 2006. Of the 2006 participants, 79 were included in the 2007 analysis, but did not update their space profiles.
- All five of the major Carnegie Foundation<sup>4</sup> classifications are represented in the data. The largest number of respondents was in the Doctoral/Research University category (105).
- Institutions with between 10,000 and 24,999 headcount enrollment were represented in the greatest number (87).
- There were no changes in the number of Public 4-Year and above participants between 2006 and 2007 (186).
- Private 4-Year and above institutions were represented by three more institutions in 2007 (48) than in 2006 (45).
- There was also a slight increase in the number of Public 2-Year participants from 41 in 2006 to 43 in 2007.
- Participants from 4-Year and above institutions reported keeping about three times as many NASF per student in inactive space (Public 5.3NASF/student; Private 5 NASF/student) as 2-Year and above institutions (1.6 NASF/student). This finding was similar in 2006.
- The distribution pattern of mean NASF per student across space types remained relatively unchanged from past surveys. Private 4-Year institutions generally provide more NASF per student in all space types than Public 4-Year respondents. However, there were marginal increases of approximately two NASF per student in Classrooms (100) and Labs/Studio (200) in Public 4-year respondents, bringing them closer to the space per student found in private institutions.
- Both Public and Private 4-Year institutions reported decreases in NASF/student in Office (300), 2-Year Office space was essentially unchanged from 2006 (10.6) at 10.5 NASF/student in 2007.

---

4. See Appendix 3 for definitions of the Carnegie classifications.

## Data Collection Method

Data for the 2007 SCUP CFI survey was again collected using the web-based survey shown in Figures 1 and 2. This method has proved robust as one person per campus was designated as the editor/respondent for the campus. Only that person could enter and/or update web submittals, which ensured a consistent point of contact and reference. As many other people on a campus as wished to could have view-only status. The editor/respondent was also the sole recipient on a campus of the Excel data set issued to all participating institutions. The data set can only be shared with other staff from the same institution for analysis purposes. As personnel changes on a campus, updates and changes to the editor/respondent designation were made during the 2007 CFI data collection period.

The first screen in the survey (Figure 1) provided demographic data entry for the participating institution. For institutions that have participated before, the demographic and past data entries pre-populated the form. Each participating institution's unique six-digit IPEDS<sup>5</sup> identification number was included in the survey, which allowed IPEDS data to be linked with CFI data within the Excel data set for easier analysis by participants. Including IPEDS data and identifiers provided participating institutions with equivalent information and ensured consistency of data across campuses. International campuses supplied demographic information in the same categories and using the same data definitions as that included in IPEDS data for US institutions.

IPEDS is the consistent and comparable set of data available for institutions in the US in such areas as the institutional characteristics of enrollment, governance, and faculty and staff numbers. Appendix 1 lists the definitions of the data extracted from IPEDS and associated with institutions that participated in the CFI. The most recent data available through the IPEDS was used. For a more complete description of the range of information collected by NCES as part of IPEDS, see [www.nces.ed.gov/ipeds](http://www.nces.ed.gov/ipeds).

In addition to single campus data entry, state system administrators were able to provide data for each campus in their system via a special menu option. This option permitted the selection of the unique IPEDS identifier associated with a single physical campus. State administrators could share data with other administrators in the system, while remaining the sole respondent/editor for the data. Thus, an entire state could easily benefit from providing CFI data.

---

5. The National Center for Education Statistics (NCES) collects institutional data through the Integrated Postsecondary Education Data System (IPEDS)

The second data entry screen (Figure 2) represented the actual survey of on-campus facilities. Respondents indicated the net assignable square feet (NASF) for various room uses. The definitions provided to participants for the room categories, as well as those for Educational and General and Auxiliary space, were included with the survey forms and are listed in Appendix 2. In each room-use classifications, participants were requested to separate the NASF use for Educational and General purposes from that used for Auxiliary purposes<sup>6</sup>. Again, for past participants, the survey screen was pre-populated so data could be simply updated or verified as still accurate by the institution.

In August 2006, NCES published an updated edition of the *Postsecondary Education Facilities Inventory and Classification Manual (FICM)*. This edition, which did not change any of the coded space-use categories, was used to generate definitions and data on the 2007 CFI survey.

The Carnegie Foundation for the Advancement of Teaching has developed a widely used typology for categorizing colleges and universities by level of degree(s) granted and research activity. The foundation released an additional, alternative method for categorizing the undergraduate focus of postsecondary institutions in 2006 (see, [www.carnegiefoundation.org](http://www.carnegiefoundation.org)). For the purposes of CFI reporting and analysis, the familiar and frequently used Carnegie classification system was employed to identify these characteristics of participating institutions (Table 1). The definitions of these categories are provided in Appendix 3.

---

6. Definitions for Educational and General and Auxiliary space uses were consistent with the NCES Postsecondary Education Facilities Inventory and Classification Manual (FICM). A link to the manual was included on the CFI web pages and the definition of each space use-code was available by ‘rolling over’ its name on the web survey. Educational and General space is used to support instruction, research, public service, academic support, student services, institutional support, and operation and maintenance of the physical plant. Auxiliary space is used to furnish goods or services to students, faculty, staff, or the community for which a fee is charged and is an enterprise that is managed as a self-supporting activity.

**Table 1 Carnegie Classification of Responding Institutions**

Carnegie Classification	Number of Institutions
Doctoral/Research Universities	105
Master's Colleges and Universities	84
Baccalaureate Colleges	39
Associate's Colleges	40
Specialized Institutions	11
Unknown	5
<b>Total Institutions Analyzed</b>	<b>284</b>

The 2007 CFI is based on data submitted from 284 institutions with 276 data sets being usable. In some cases there were insufficient or incomplete data. In other cases, questions of data accuracy could not be resolved. In both these instances, data were not included in the analyses presented in this report. However, if an institution participated in the CFI, even if it provided unusable data, the institution received a copy of the complete data set. SCUP will continue to work with interested institutions to ensure data accuracy and consistency. Institutions that participated in the 2007 CFI survey are listed in Appendix 4.

## SCUP's Campus Facilities Inventory Survey (SCUP-CFI)

Please assist us by answering the following questions. Your response will help us to gather higher education space data. **Names of institutions participating in the survey, along with their data, are shared ONLY with other institutions that complete the survey for 2007.**

**Important notes as you complete the survey:**

1. Room Use codes are consistent with the NCES *Postsecondary Education Facilities Inventory and Classification Manual*, 1992. Definitions and examples are available throughout the survey.
2. All room use-categories include support space for that category.
3. Please use whole numbers - no fractions or decimals.

### INSTITUTION IPEDS NUMBER AND NAME

You are about to submit data for the following institution:

IPEDS code: 108108108

Institution: SCUP-Main

### YOUR PERSONAL DEMOGRAPHICS

Before you answer our survey questions, please check **your** demographic information below and make any necessary changes. Please provide the date information for "date of space data" at the bottom of the your demographics.

Respondent: **Marc Johns** (Data access level: [\[?\]](#) editor)

**Your** Institution: Society for College and University Planning

Job Title: **IT Mgr**

Department: **EMedia**

Address: **Ste 300**

## Summary of the 2007 SCUP CFI Data

The data presented in this section are based on the 284 higher education institutions that participated in the 2007 SCUP CFI survey (See Appendix 4). Since institutions need only enter data every other year, this data includes information from 79 of the institutions that participated in the 2006 survey. The remaining 205 respondents submitted data in 2007. All of these institutions are in the United States. Less than ten international institutions participated in the 2007 survey, and although they receive data for benchmarking, their information is not included in the aggregate analyses presented here.

Information from the Integrated Postsecondary Data System (IPEDS) that is collected and maintained by the National Center for Educational Statistics (NCES), was downloaded for each participating institution. The analyses presented in this report used the most recent data available from NCES<sup>7</sup>. IPEDS data was then used to create the classifications used in this report to identify institutions by their student and faculty headcounts, governance (private or public, all institutions were non-profit), and level (four-year-and-above and two-year).

Table 2 provides information on the SCUP members who took part in the 2007 CFI survey, how that subset of SCUP membership compares with the total set of SCUP members, and the breakdown of IPEDS-reporting institutions in each category.

**Table 2 Number and Percentage Distribution of Colleges and Universities**

Eight responding institutions were removed due to status as “unknown” or as having incomplete data.

Type of Institution	2007 SCUP Member Institutions	% SCUP Total	Members in 2007 CFI Survey	% 2007 Survey Total	IPEDS Institutions	IPEDS %of Total
Public 4-Year-and-Above	278	44%	187	68%	639	29%
Private 4-Year-and-Above	241	38%	47	17%	1954	2%
Public 2-Year	109	17%	41	15%	1153	4%
Private 2-Year	4	>1%	1	>1%	1035	>1%
Totals	632	100%	276	100%	4781	6%

Note: Count of IPEDS Institutions based on 2006 Institutional Characteristics

7. <http://www.nces.ed.gov/ipeds/>

As with past surveys, the public four-year-and-above campuses had the highest participation rate among SCUP members in each of the four institutional types. While comprising 44 percent of SCUP member institutions, they represented 68 percent of the survey respondents. All other participation rates were unchanged from 2006 across institutional categories. Respondents to the CFI survey do not represent the population of US higher education institutions included in IPEDS.

Table 3 shows the breakdown of 2007 CFI participants by headcount enrollment category. Schools with enrollments from 10,000 to 24,999 continue to constitute the largest number of participants.

**Table 3 Number of SCUP CFI Participants by Enrollment and Sector**

Headcount Enrollment	SCUP Participants by Sector				2007 Total	2006 Total
	Public 4-year or Above	Private 4-year or Above	Public 2-year	Private 2-year		
Fewer Than 2,500 Students	26	12	11	1	51	51
2,500–4,999 Students	14	11	12	0	38	39
5,000–9,999 Students	28	14	10	0	49	46
10,000–24,999 Students	70	11	6	0	90	88
25,000 or More Students	48	0	2	0	48	49
<b>2007 Totals</b>	<b>186</b>	<b>48</b>	<b>41</b>	<b>1</b>	<b>276</b>	
2006 Totals	186	45	41	0		273

There were 276 institutions that submitted useable data in 2007. An additional eight campuses, primarily international, entered data but were excluded from analyses for 2007.

The 276 colleges in the 2007 CFI reported having 677,633,100 net assignable square feet (NASF). As can be seen from Table 4 below, public four-year-and-above institutions represented the bulk of the NASF at 84 percent. This is expected as they represent nearly 68 percent of the total survey population.

**Table 4 Total NASF by Enrollment and Sector for SCUP CFI Participants**  
Numbers are based on 276 participating institutions.

Headcount Enrollment	NASF by Sector			Total
	Public 4-year or Above	Private 4-year or Above	Public/Private 2-year	
Fewer Than 2,500 Students	14,922,135	8,326,205	1,592,331	24,840,671
2,500–4,999 Students	13,515,678	7,285,596	2,930,698	23,731,972
5,000–9,999 Students	32,139,014	23,862,439	2,206,708	58,208,161
10,000–24,999 Students	214,821,892	54,886,594	3,526,220	273,234,706
25,000 or more Students	295,590,055	0	2,027,535	297,617,590
<b>Totals</b>	570,988,774	94,360,834	12,283,492	677,633,100
Percent of Total	84%	14%	2%	100%

Note: Only one private 2-year institution replied to the 2007 survey. As in the past, in the interest of confidentiality, that institution's data has been aggregated throughout this report with public 2-year colleges.

Additionally, although the number of institutions with enrollments between 10,000 and 24,999 represented 31 percent of the respondents (Table 3), their space is 40 percent of the total reported NASF (Table 4). Campuses with the highest enrollments provide 44 percent of the NASF reported and comprised 18 percent of the participants.

It is important to note that the CFI represents a relatively small number of institutions across the spectrum of campuses, less than six percent of the total.

Table 5 below shows the respondents' mean NASF by the five enrollment categories. As expected, the mean amount of space per institution in the CFI survey increased as the enrollment size did.

**Table 5 Mean NASF Per Institution by Enrollment and Sector for SCUP CFI Participants**

Headcount Enrollment	Mean NASF by Sector			All Institutions
	Public 4-year or Above	Private 4-year or Above	Public/Private 2-year	
Fewer Than 2,500 Students	573,928	693,850	132,694	496,813
2,500–4,999 Students	1,093,977	662,327	209,336	608,512
5,000–9,999 Students	1,190,334	1,704,460	245,190	1,164,163
10,000–24,999 Students	3,113,361	4,989,690	587,703	3,177,194
25,000 or More Students	6,158,126	N/A	1,013,768	5,952,351
<b>Mean NASF by Sector</b>	<b>3,103,200</b>	<b>1,965,851</b>	<b>285,663</b>	<b>2,464,135</b>

Table 6 shows the mean NASF per student, by enrollment sector, for each of the nine space categories. Private four-year-and-above institutions continue to report the highest NASF mean per student in all but the support area (700).

**Table 6 Mean NASF Per Student by Space Type and Sector**

Room Use	Mean NASF / Student by Sector			
	Public 4-Year or Above	Private 4-year or Above	Public/Private 2-Year	All Institutions
100 Classrooms	13.2	19.1	9.8	13.6
200 Lab/Studio	35.1	37	14.3	32.1
300 Office	49.0	50.5	10.6	43.1
400 Study	12.4	20.6	3.8	12.4
500 Special/Athletic	24.8	32.8	4.8	23.0
600 General/Campus	19.1	29.9	6.9	19.0
700 Support	22.7	25.8	3.6	23.4
000 Inactive	5.3	5.0	1.6	4.6
<b>Subtotal:</b>	<b>181.6</b>	<b>220.7</b>	<b>55.4</b>	<b>171.2</b>
800 Health Care	12.6	1.4	0.0	8.7
900 Residential	43.3	94.3	8.5	44.2
<b>Mean NASF Per Student by Sector</b>	<b>237.5</b>	<b>316.4</b>	<b>63.9</b>	<b>224.1</b>

Table 7 (A and B) shows the average NASF per student by enrollment category. Table 7A shows space per student based on all respondents, and Table 7B excludes schools whose enrollment is predominantly in graduate and professional programs. Schools that are predominately graduate and professional affect the apparent NASF per student in public four-year-and-above institutions with less than 10,000 students. When these campuses are excluded from the analysis, the average NASF per student is significantly smaller.

**Table 7A Total Campus NASF Per Student\***  
(All Respondents)

Headcount Enrollment	NASF per Student by Sector		
	Public 4-Year or Above	Private 4-year or Above	Public/Private 2-Year
Fewer Than 2,500 Students	298.9	251.2	76.6
2,500–4,999 Students	209.6	123.6	46.6
5,000–9,999 Students	145.9	161.2	31.2
10,000–24,999 Students	112.6	220.0	38.0
25,000 or More Students	121.7	0.0	30.4

\*Excluding parking structures, health care facilities, residential space, and inactive space.

*Please be cautious when using the data in Tables 7 and 8, as, in some cases, the number of CFI respondents is relatively small compared with the total number of similar institutions in the United States.*

**Table 7B Total Campus NASF Per Student\***  
 (Excluding Schools with Predominantly Graduate and Professional Students)

Headcount Enrollment	NASF per Student by Sector		
	Public 4-Year or Above	Private 4-Year or Above	Public/Private 2-Year
Fewer Than 2,500 Students	141.2	251.2	76.6
2,500–4,999 Students	209.6	125.8	46.6
5,000–9,999 Students	140.4	161.2	31.2
10,000–24,999 Students	112.6	173.3	38.0
25,000 or More Students	121.7	N/A	30.4

\* Excluding parking structures, health care facilities, residential space, and inactive space.

Space per faculty member in the enrollment categories are contained in Table 8 (A and B). These numbers are also shown with (8A) and without schools (8B) where students are predominately enrolled in graduate or professional programs. Unlike student space, the difference in NASF per faculty member is less dramatic when these schools are excluded, except in the case of Public 4-year institutions with fewer than 2,500 students and Private 4-year or above with between 10,000 and 24,999 students.

**Table 8A Total Campus NASF Per FTE Faculty Member\*** (All Respondents)

Headcount Enrollment	NASF per Faculty Member by Sector		
	Public 4-Year or Above	Private 4-Year or Above	Public/Private 2-Year
Fewer Than 2,500 Students	2012.0	2843.1	1260.6
2,500–4,999 Students	2752.2	1766.8	1239.1
5,000–9,999 Students	1875.1	2114.2	1142.3
10,000–24,999 Students	2364.6	2466.0	1400.4
25,000 or More Students	2514.2	N/A	1886.2

**Table 8B Total Campus NASF Per FTE Faculty Member\***  
(Excluding Schools with Predominantly Graduate and Professional Students)

Headcount Enrollment	NASF per Faculty Member by Sector

25,000 or More Students	2514.2	N/A	1886.2

\* Excluding parking structures, health care facilities, residential space, athletic space, and inactive space.

Table 9 looks at mean NASF for classrooms (Space Use Code 100) per student by enrollment size. The range of mean NASF per student is from 6.6 to 26.3. The 2007 means had considerably more variance than the range for 2006 participants (8 to 18). The mean of classroom NASF per student was lower at larger institutions, as has been the case in past surveys. Larger enrollment institutions are more complex and classrooms represent a smaller portion of their total NASF.

Smaller enrollment institutions, especially private colleges, increasingly are reported to be moving to flexible seating arrangements in classrooms; as such, they accommodate fewer students. Tables and chairs require more space per student than tablet chairs or theater seating in large auditoriums. Smaller enrollment can also result in different scheduling policies, as classes may not be held at certain times for programmatic reasons. This results in lower classroom utilization and an increased need for additional space, increasing the NASF per student for classroom space. Due to the atypical use of classrooms (e.g., clinical practice, problem-based learning, etc.) in graduate and professional institutions, that information has not been included in this analysis.

**Table 9 Mean Classroom NASF Per Student**  
(Excluding Schools with Predominantly Graduate and Professional Students)

Headcount Enrollment	Mean Classroom NASF by Sector		
	Public 4-Year or Above	Private 4-year or Above	Public/Private 2-Year
Fewer Than 2,500 Students	17.7	26.3	12.4
2,500–4,999 Students	17	19	7.9
5,000–9,999 Students	10.1	13.6	6.6
10,000–24,999 Students	9.1	14.1	7.2
25,000 or More Students	7.8	-	8.9

The chart below is a graphic interpretation of classroom space per student. The five bars represent public and private four-year-and-above institutions with and without those institutions comprised predominantly of graduate and professional students, and two-year institutions.

**Chart 1**  
**Space Type 100 - Classrooms: NASF per Student**

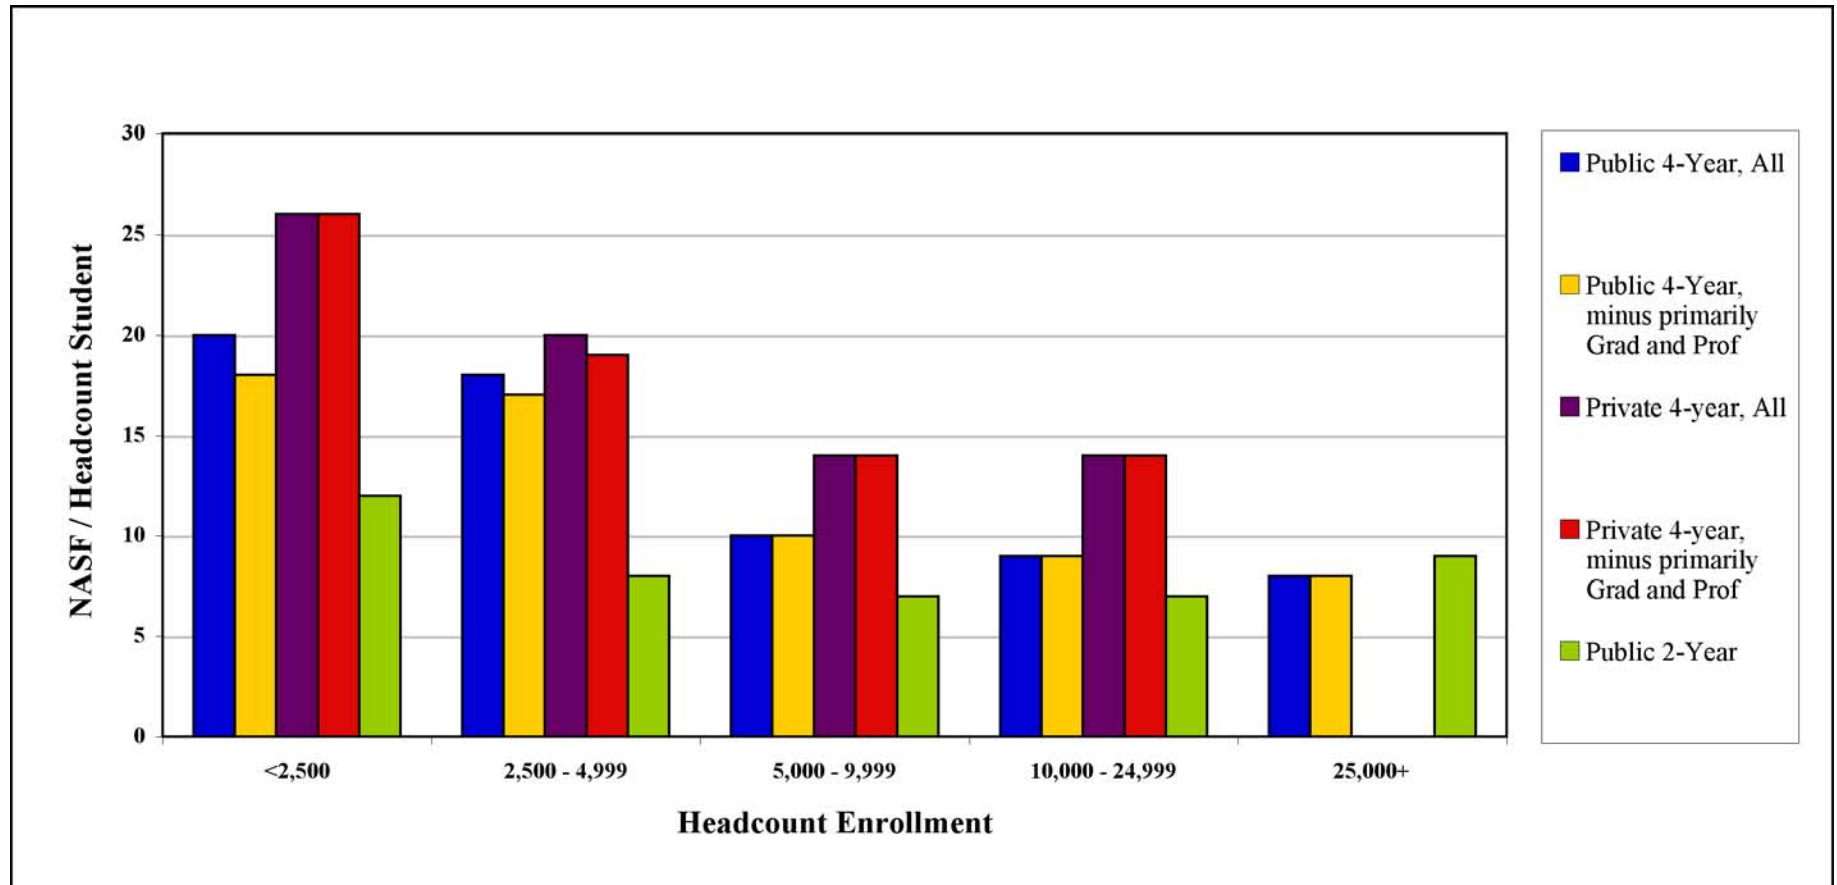

Chart 2 shows teaching lab and studio space per student. At the smallest institutions, those with fewer than 2,500 students, the NASF per student is greatest. There are few other discernable patterns among the participating campuses on this measure.

**Chart 2**  
**Space Type 210/220 - Instructional Labs and Studios: NASF per Student**

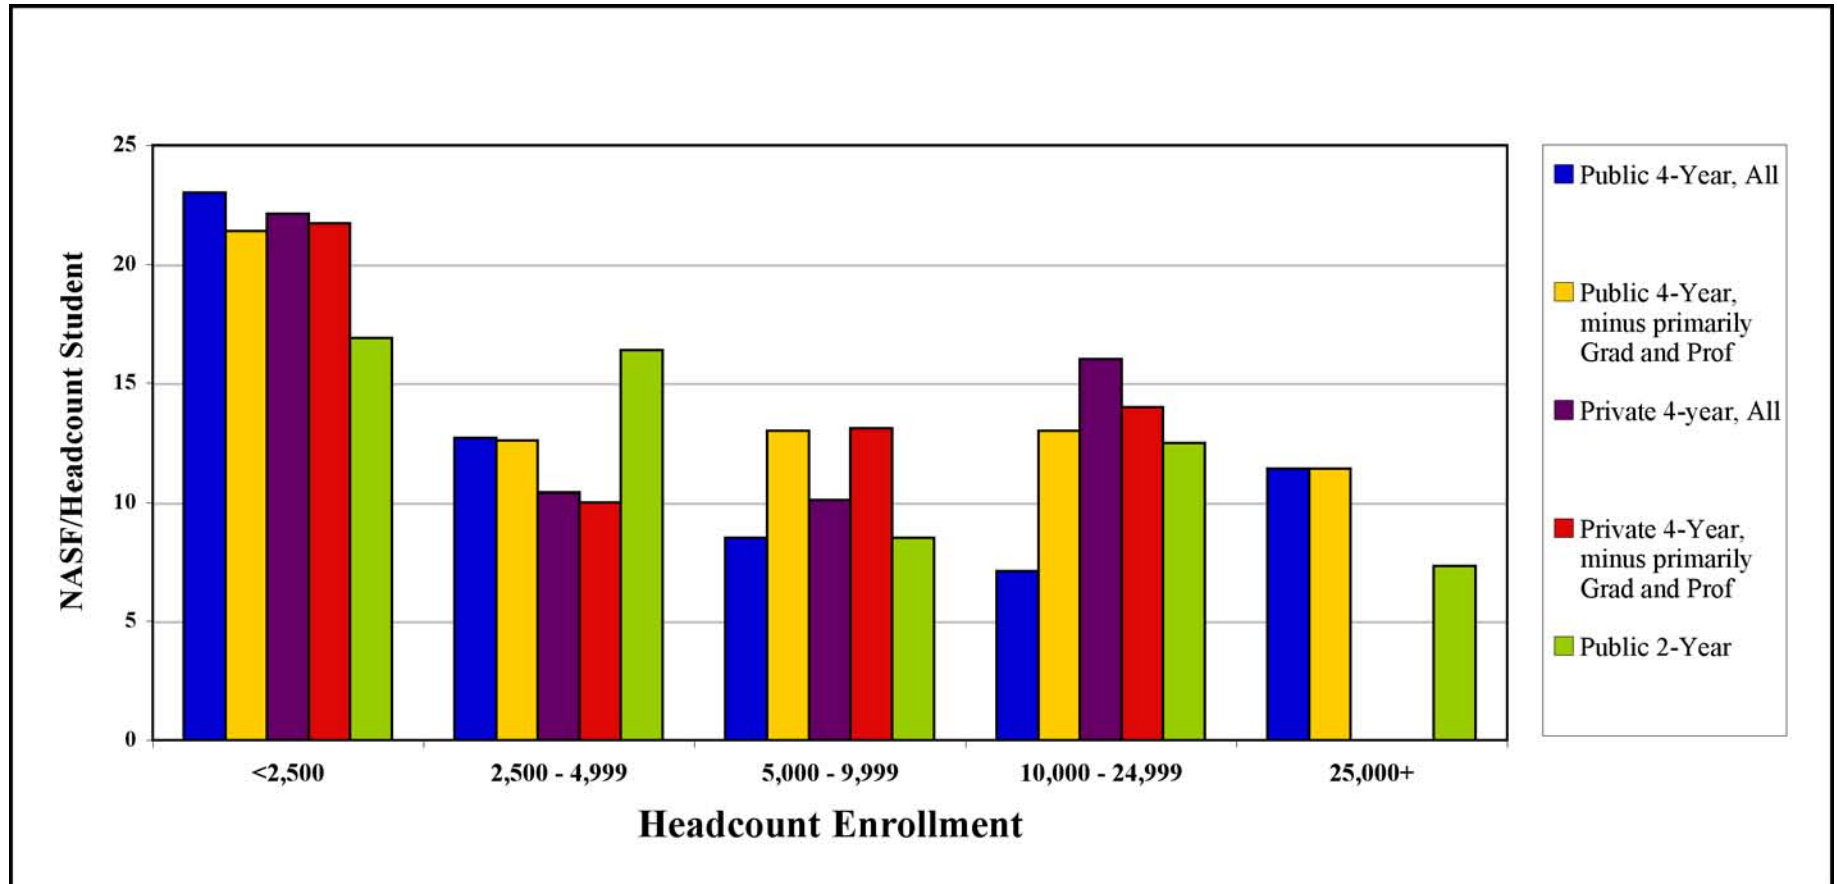

Chart 3 depicts the amount of research lab space per student. Research lab space as a mean NASF per student is highest at public four-year-and-above institutions with smaller enrollments (2,500-4,999). However, when schools with predominantly graduate and professional students are excluded, the NASF per

student falls into the range seen at higher enrollment levels for public schools. In general, private schools offer more research lab space per student than public institutions once this correction is made. As increased emphasis is placed on undergraduate research, a clear trend now, the NASF of research lab space per student will increase in importance. Likewise, as all schools increase their focus on bench research as a way to increased rankings, it may be that teaching lab space will double as research laboratories and begin to skew these categories.

**Chart 3**  
**Space Type 250 - Research Labs: NASF per Student**

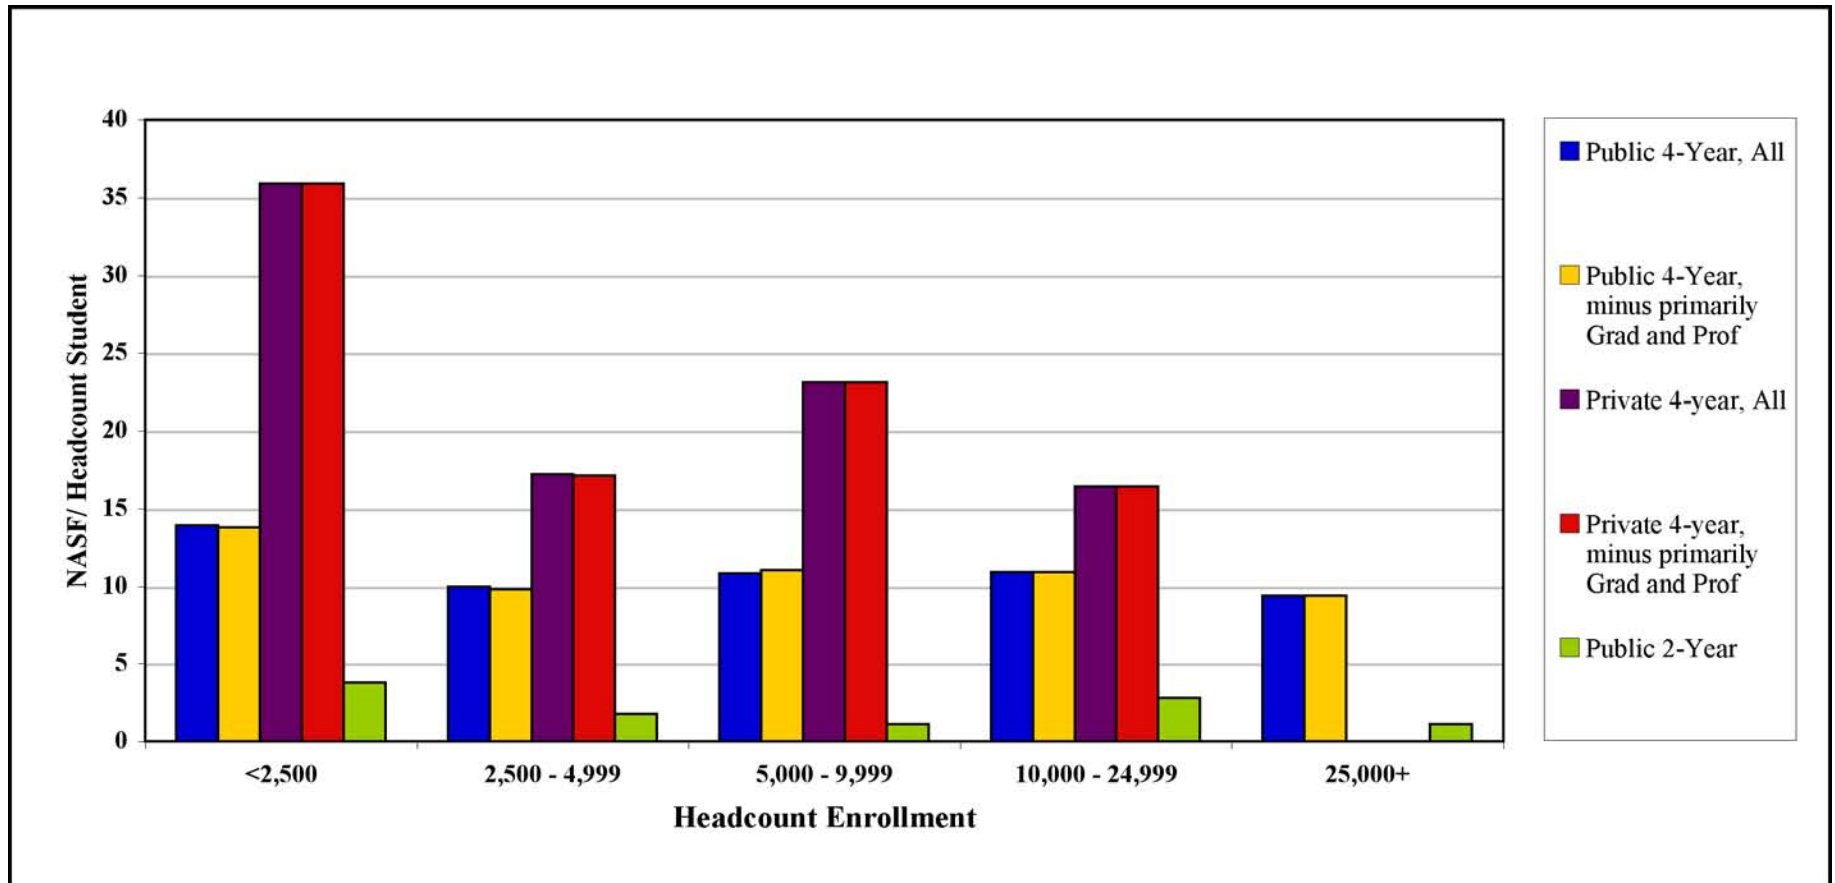

Study facilities, including library space, are shown in Chart 4. The distribution of NASF of study space per student has remained consistent across all CFI surveys. Private four-year-and-above institutions have the highest average NASF per student as in the past.

**Chart 4**  
**Space Type 400 - Study Facilities: NASF per Student**

Athletic space is shown in Chart 5. Athletic facilities as average NASF per student is highest in private institutions at all enrollment levels.

**Chart 5**  
**Space Type 520 - Athletic Facilities: NASF per Student**

Tables 10 through 19, presented in the next section of the report, sort the results of the 2007 SCUP CFI data according to governance structure (public or private), headcount enrollment, and the categories of space use requested from participants. Each table is displayed in two versions. The first includes all participants in the indicated sector. The second table excludes those participants, where they existed, with predominantly graduate or professional enrollments. The exception to this schema is for two-year colleges, where all enrollment sizes and governance forms are presented in Table 19. Each table includes the number of CFI participants represented in the data on that page.

The amount of space (NASF) associated with each of the 14 space-use categories is listed in each table. Space use types included and excluded in each category are noted in the tables. Mean NASF per student and per faculty member are displayed at the bottom of each table. These numbers exclude parking structures, residential space, and space that is either inactive or being altered (Space Use Codes 050 and 060). Athletic space is also excluded from the mean NASF per faculty member.

## IPEDS Descriptions

## Appendix 1

### OBereg

Bureau of Economic Analysis Code (OBE) Region

OBE Region Codes:

- 0 - US Service Schools
- 1 - New England (CT ME MA NH RI VT)
- 2 - Mid East (DE DC MD NJ NY PA)
- 3 - Great Lakes (IL IN MI OH WI)
- 4 - Plains (IA KS MN MO NE ND SD)
- 5 - Southeast (AL AR FL GA KY LA MS SC TN VA WV)
- 6 - Southwest (AZ NM OK TX)
- 7 - Rocky Mountains (CO ID MT UT WY)
- 8 - Far West (AK CA HI NV OR WA)
- 9 - Outlying areas (AS FM GU MH MP PR PW VI)
- 3 - Not available

### LOCALE

Degree of urbanization

LOCALE Codes:

- 1 - Large City (CMSA or MSA with the city having a population greater than or equal to 250,000)
- 2 - Mid-size City (CMSA or MSA less than 250,000)
- 3 - Urban Fringe of Large City
- 4 - Urban Fringe of Mid-size City
- 5 - Large Town (incorporated place or CDP with a population greater than or equal to 25,000 and located outside a CMSA or MSA)
- 6 - Small Town (incorporated place or CDP with a population less than 25,000 and greater than or equal to 2,500 outside a CMSA or MSA)
- 7 - Rural (any incorporated place designated as rural by the Census Bureau)
- 9 - Not assigned
- 3 - Not available

**SECTOR**

## Sector of Institution

- 0 - Administrative unit only
- 1 - Public, 4-year or above
- 2 - Private nonprofit, 4-year or above
- 3 - Private, for-profit, 4-year or above
- 4 - Public, 2-year
- 5 - Private nonprofit, 2-year
- 6 - Private, for-profit, 2-year
- 7 - Public, less-than-2-year
- 8 - Private nonprofit, less-than-2-year
- 9 - Private for-profit, less-than-2-year
- 3 - Not available

**HBCU**

Historically Black College or University

Historically Black College or University (accredited institution of higher education established prior to 1964 with the principal mission of educating Black Americans.)

- 1 - Yes
- 2 - No

## **CARNEGIE**

### Carnegie Classification Code

- 15 - Doctoral/Research Universities--Extensive
- 21 - Master's Colleges and Universities I
- 22 - Master's (Comprehensive) Colleges and Universities II
- 31 - Baccalaureate Colleges--Liberal Arts
- 32 - Baccalaureate Colleges--General
- 33 - Baccalaureate/Associate's Colleges
- 51 - Theological seminaries and other specialized faith-related institutions
- 52 - Medical schools and medical centers
- 53 - Other separate health profession schools
- 54 - Schools of engineering and technology
- 55 - Schools of business and management
- 56 - Schools of art, music, and design
- 57 - Schools of law
- 58 - Teachers colleges
- 59 - Tribal Colleges and Universities

## **ROOMCAP**

### Total Dormitory Capacity

If institution provides on-campus housing, specify dormitory capacity for academic year

## **Class**

Enrollment Class (corresponds to original HEGIS Survey):

- A = < 2,500 Students
- B = 2,500 - 4,999 Students
- C = 5,000 - 9,999 Students
- D = 10,000 - 24,999 Students
- E = 25,000+ Students

## FICM Space Classification Definitions

## Appendix 2

### Room Use

### Room Use Code or Equivalent

Definitions from 1992 NCES Facilities Inventory and Classification Manual (FICM)

#### **Classroom**

**100 (all)**

A room used for classes and that is also not tied to a specific subject or discipline by equipment in the room or the configuration of the room. Exclude Room Use codes for Conference Rooms (350), Meeting Rooms (680), Auditoria (610), or Class Laboratories (210). Examples of this code include general purpose classrooms, lecture halls, seminar rooms, help rooms, and other instructional spaces not specifically set up as teaching laboratories.

#### **Laboratories: Instructional, Class Laboratories**

**210, 215**

A room used primarily for formally or regularly scheduled classes that require special purpose equipment or specific room configuration for student participation, experimentation, observation, or practice in an academic discipline. A room that directly serves one or more class laboratories as an extension of the activities in those rooms. Exclude Room Use codes (220), (225), (250), and (255). Rooms in this code include computer labs for instruction, science teaching laboratories, graphics design laboratories, and other spaces with specialized equipment used predominantly for scheduled instruction.

#### **Laboratories: Instructional, Open Laboratories**

**220, 225**

A laboratory used primarily for individual or group instruction that is informally scheduled, unscheduled, or open. A room that directly serves one or more open laboratories as an extension of the activities in those rooms. Exclude Room Use codes (210), (215), (250), and (255). Examples of this code include open computer rooms for use by students throughout the day, unscheduled science or other laboratories, or digital reproduction spaces not used for general instruction but available for students or instructors on an as needed basis.

**Laboratories: Research****250, 255**

A room used primarily for laboratory experimentation, research or training in research methods; or professional research and observation; or structured creative activity within a specific program. Exclude Room Use codes (210), (215), (220), and (225). Examples of this code include faculty bench research space (not offices), art production/design space, or rooms equipped for clinical observation for research purposes.

**Offices****300 (all)**

Office facilities are individual, multi-person, or workstation space specifically assigned to academic, administrative, and service functions of a college or university. Examples include faculty offices, staff offices, graduate student offices, and administrative offices.

**Study Space****400 (all)**

Study space is classified into five categories: Study room, stack, open-stack study room, processing room, and study service. Offices used for library activities are coded as office facilities. A study room may contain equipment or materials which aid the study or learning process (e.g., microcomputers, computer terminals, multimedia carrels, typewriters, records and tapes) and which do not restrict the room to a particular academic discipline or discipline group. Examples of this code include most library facilities, study areas in student unions, and general help rooms not designated for a specific discipline.

**Athletic****520, 523, 525**

A room or area used by students, staff, or the public for athletic or physical education activities. The seating area used by students, staff, or the public to watch athletic events. A room that directly serves an athletic or physical education facility as an extension of the activities in that facility. Examples of this code include indoor (enclosed) football stadiums, recreational buildings, bowling lanes, indoor swimming pools, fitness rooms in residence halls or other spaces, or basketball arenas. Offices in these areas should be included under office space, even though located and funded by an athletics department.

**Special Use****500**

Areas and rooms for military training, athletic activity, media production, clinical activities (outside of separately organized health care facilities), demonstration, agricultural field activities, and animal and plant shelters are included here. Excludes Room Use codes (520), (523), and (525) Athletic uses. Examples of this code include greenhouses, ROTC buildings/rooms for training or other purposes, or behavioral health clinics (psychological, physical therapy, student counseling centers) not in a health care building.

**General Use****600 (all)**

General use facilities are characterized by a broader availability to faculty, students, staff, or the public. General use facilities comprise a campus-wide general service or functional support system (assembly, exhibition, dining, relaxation, merchandising, recreation, general meetings, day care) for the institutional and participant community populations. Examples of this code include theaters, conference centers, child care centers, domestic violence shelters, museums, non-residence hall eating facilities open to the public, bookstores, or recreational facilities that are consistently open to the public.

**Support****700**

Support facilities, which provide centralized space for the various auxiliary support systems and services of a campus, help keep all institutional programs and activities operational. They typically serve an area ranging from an entire building or organizational unit to the entire campus. Exclude Room Use codes (730), (735), (740), and (745). Examples in this code include laundry facilities, printing shop, telecommunications room, or general repair facilities (non-vehicular).

**Central Storage****730, 735**

A room or building that is used to store equipment or materials and that serves multiple room use categories, organizational units, or buildings. A room that directly serves a central storage facility as an extension of the activities in that facility. Examples of this code include warehouses, rooms associated with the transporting of materials in an out of large central storage facilities and warehouses, surplus storage, campus central supply or storage and inactive storage. Limitations: does not include a storage room directly serving a primary room use category or group of such rooms (e.g., theater storage would be coded as 615, paper storage as 315, any service type xx5 use). Space in this category is for general or central storage.

**Vehicular Storage****740, 745**

A room or structure that is used to store or house vehicles. A room that directly serves a vehicle storage facility as an extension of the activities in that facility. Examples of this code include parking structures that store campus vehicles, campus motor pools, campus vehicle repair facilities, airplane hangars, or bus terminals. Limitations: please do not include campus parking facilities for faculty, staff, students.

**Health Care****800 (all)**

This series provides room use classification for patient care rooms that are located in separately organized health care facilities: student infirmaries, teaching hospitals and clinics, and veterinary and medical schools. Room codes and definitions apply to both human and animal health care areas; excluded are clinic facilities located outside of separately organized health care facilities (see 500, Special Use). Examples in this code include teaching hospitals, clinics associated with medical education, or buildings used exclusively for medical education. Limitations: the codes in this series are confined to the settings listed above. Health care facilities typically house other areas that are classified using applicable codes from other room use classification series (e.g., classroom, laboratory, office, special use, etc.).

**Student Residential****900**

Residential facilities include housing for students at the institution. Examples of this code include residence halls and student apartment complexes.

**Non-Student Residential****900**

Residential facilities include housing for faculty, staff, and visitors to the institution. Hotel or motel and other guest facilities are included in this series if they are owned or controlled by the institution and used for purposes associated with defined missions (i.e., excluding commercial investment). Examples of this code include residence halls, student or faculty apartment complexes, or guest facilities that are not designated as profit centers.

**Inactive or Alteration Areas****050, 060**

Includes rooms available for assignment to an organizational unit or activity but unassigned at the time of the inventory. Includes rooms temporarily out of use because they are being altered, remodeled, or rehabilitated at the time of the inventory. Examples of this code include swing space (not presently occupied) that is used to temporarily house programs/people whose permanently assigned offices/labs are not available.

## **Miscellaneous**

### **Educational & General**

Space used to support instruction, research, public service, academic support, student services, institutional support, and operation and maintenance of the physical plant. Examples of this categorization include classrooms, laboratories, libraries, some performing arts spaces, offices, student counseling offices, or vehicular storage.

### **Auxiliary Enterprises**

Space used to furnish goods or services to students, faculty, or staff; and for which a fee is charged that directly relates to, although is not necessarily equal to, the cost of the goods or services. The distinguishing characteristic of an auxiliary enterprise is that it is managed as an essentially self-supporting activity. Examples are residence halls, food services, inter-collegiate athletics (only if essentially self-supporting), college stores, faculty clubs, faculty and staff parking, and faculty housing. The general public may be served incidentally by auxiliary enterprises.

### **Net Assignable Square Feet (NASF)**

The sum of all areas on all floors of a building assigned to, or available for assignment to, an occupant or specific use. Areas defined as building service, circulation, mechanical, and structural should not be included.

### **Gross Square Feet (GSF)**

The sum of all areas on all floors of a building included within the outside faces of its exterior walls, including floor penetration areas, however insignificant, for circulation and shaft areas that connect one floor to another. Measured in terms of GSF, Gross Area = Net Usable Area+ Structural Space. Please note that GSF is often not collected on a campus, not collected consistently among buildings when it is collected (e.g., insurance measures versus architectural blue-prints versus physical plant measurements, etc.), or available only by applying an algorithm to NASF (e.g.,  $GSF = NASF \times 1.2$ ).

## **Carnegie Classification Definitions<sup>1</sup>**

## **Appendix 3**

### **Doctorate-granting Institutions**

Doctoral/Research Universities—Extensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded 50 or more doctoral degrees per year across at least 15 disciplines.

Doctoral/Research Universities—Intensive: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the doctorate. During the period studied, they awarded at least ten doctoral degrees per year across three or more disciplines, or at least 20 doctoral degrees per year overall.

### **Master's Colleges and Universities**

Master's Colleges and Universities I: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 40 or more master's degrees per year across three or more disciplines.

Master's Colleges and Universities II: These institutions typically offer a wide range of baccalaureate programs, and they are committed to graduate education through the master's degree. During the period studied, they awarded 20 or more master's degrees per year.

---

1. Definitions are quoted from the Carnegie Foundation web site: [www.carnegiefoundation.org/Classification/CIHE2000/defNotes/Definitions.htm](http://www.carnegiefoundation.org/Classification/CIHE2000/defNotes/Definitions.htm).

### **Baccalaureate Colleges**

Baccalaureate Colleges—Liberal Arts: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. During the period studied, they awarded at least half of their baccalaureate degrees in liberal arts fields.

Baccalaureate Colleges—General: These institutions are primarily undergraduate colleges with major emphasis on baccalaureate programs. During the period studied, they awarded less than half of their baccalaureate degrees in liberal arts fields.

Baccalaureate/Associate's Colleges: These institutions are undergraduate colleges where the majority of conferrals are below the baccalaureate level (associate's degrees and certificates). During the period studied, bachelor's degrees accounted for at least ten percent of undergraduate awards.

### **Associate's Colleges**

These institutions offer associate's degree and certificate programs but, with few exceptions, award no baccalaureate degrees. This group includes institutions where, during the period studied, bachelor's degrees represented less than 10 percent of all undergraduate awards.

### **Specialized Institutions**

These institutions offer degrees ranging from the bachelor's level to the doctorate, and typically award a majority of degrees in a single field. The list includes only institutions that are listed as separate campuses in the 2000 Higher Education Directory. Specialized institutions include:

Theological seminaries and other specialized faith-related institutions: These institutions primarily offer religious instruction or train members of the clergy.

Medical schools and medical centers: These institutions award most of their professional degrees in medicine. In some instances, they include other health professions programs, such as dentistry, pharmacy, or nursing.

Other separate health profession schools: These institutions award most of their degrees in such fields as chiropractic, nursing, pharmacy, or podiatry.

Schools of engineering and technology: These institutions award most of their bachelor's or graduate degrees in technical fields of study.

Schools of business and management: These institutions award most of their bachelor's or graduate degrees in business or business-related programs.

Schools of art, music, and design: These institutions award most of their bachelor's or graduate degrees in art, music, design, architecture, or some combination of such fields.

Schools of law: These institutions award most of their degrees in law.

Teachers colleges: These institutions award most of their bachelor's or graduate degrees in education or education-related fields.

Other specialized institutions: Institutions in this category include graduate centers, maritime academies, military institutes, and institutions that do not fit any other classification category.

Central Connecticut State University  
Central Michigan University

## Appendix 4

Central Oregon Community College  
Central Piedmont Community College  
Centralia College  
Chandler/Gilbert Community College  
City University of New York System Office  
Cleveland State University  
Colorado College  
Columbia University  
Concord University  
Cornell University  
Dakota State University  
Duke University  
East Carolina University  
East Tennessee State University  
Edgewood College  
Embry Riddle Aeronautical University-Daytona Beach  
Fairmont State University  
Flathead Valley Community College  
Florida Atlantic University  
Florida Gulf Coast University  
Florida International University  
Fordham University  
George Mason University  
Georgia Institute of Technology-Main Campus  
Georgia Southern University  
Georgia State University  
Germanna Community College  
Glenville State College  
Grand Valley State University  
Henderson State University  
Humboldt State University  
Illinois State University  
Indiana State University  
Indiana University-Bloomington  
Iowa State University  
Ivy Tech State College-Bloomington  
Ivy Tech State College-Central Indiana  
Ivy Tech State College-Columbus  
Ivy Tech State College-East Central  
Ivy Tech State College-Kokomo  
Ivy Tech State College-Lafayette  
Ivy Tech State College-Northcentral  
Ivy Tech State College-Northeast  
Ivy Tech State College-Northwest  
Ivy Tech State College-South Central  
Ivy Tech State College-Southeast  
Ivy Tech State College-Southwest  
Ivy Tech State College-Wabash Valley  
Ivy Tech State College-Whitewater  
Jacksonville State University  
James Madison University  
John Carroll University  
Kaskaskia College  
Kennesaw State University  
Kent State University-Ashtabula Campus  
Kent State University-East Liverpool Campus  
Kent State University-Geauga Campus  
Kent State University-Main Campus  
Kent State University-Salem Campus  
Kent State University-Stark Campus  
Kent State University-Trumbull Campus  
Kent State University-Tuscarawas Regional Campus  
King's College  
Landmark College  
Lehigh University
