

UAA ANNUAL REPORT ON PERSISTENCE AS OF FALL 2021

Purpose and use: Annual reports on the student achievement metrics serve as status reports for performance on each measure. Sharing these reports keeps the institution focused on and accountable for the measures. They show progress toward goals and help identify areas that may need additional work or investment. Disaggregating data allows the institution to track efforts to close equity and performance gaps. These reports are posted on the website for dissemination to governance and leadership groups to be used for continuous improvement to inform planning, decision making, and allocation of resources.

PERSISTENCE: THE BIG PICTURE

- Persistence data demonstrate that full-time students persist at a higher level than part-time students for both baccalaureate and associate-seeking students, although the spread is significantly smaller at the associate level, as seen in Figure 1.1 and Figure 1.2.

PERSISTENCE FROM 1ST FALL TO 1ST SPRING TERM, DISAGGREGATED

DEFINITION: The percentage of first-time associate and baccalaureate degree-seeking freshmen who enter in a given fall term and return the following spring term.

RATIONALE: When a student persists from their 1st fall to their 1st spring, it can indicate that the student felt welcomed, supported, and connected inside and outside the classroom. This welcome and support has been shown to motivate students to remain enrolled in their studies at an institution. Laying a foundation in the first semester and seeing the student continue is a strong indication of ongoing retention and ultimately graduation.

PEER COMPARISON: No comparator peer data are available.
